RESPONSE TO EXECUTIVE DIRECTOR'S RESPONSE, THE OFFICE OF  
PUBLIC INTEREST COUNSEL'S RESPONSE, AND APPLICANT'S RESPONSE  
TO REQUEST FOR HEARING, JUNE 18, 2008 AUSTIN, TEXAS

---

Dear Executive Director Shankle, et al involved with decision making for TCEQ:

I believe that I am an "affected person" and therefore a "requestor." I believe that issues relevant and material to your decision on the application need to be corrected and disputed until the materials presented by "applicant" are true.

I feel it is my duty, privilege, and legal right to see that you have the correct information regarding the proposed wastewater treatment facility. My property and home are within  $\frac{1}{4}$  to  $\frac{1}{2}$  mile of the discharge route (unnamed tributary) and lake (unnamed reservoir)—Watson Branch and Big Sandy Watershed Project Site #35 (a million dollar government built 16 acre lake). It was never intended to flow downstream anywhere until it is in "flood condition." This sewage would not be able to have an "extended aeration mode" as described in the description in the applicant's application.

I have a reasonable interest in this proposed facility and discharge route because I live nearby. As a member of the member-owned electric co-op, Wise Electric Cooperative re Wise Service Company—Water since 1970, I feel I should seek true results that so far the "applicant" has not provided.

The most blatant errors are the on the map provided to TCEQ Office of Legal Services by the "applicant." Realizing it is a 2004 image, the placement of interested "affected" persons should be current 2007-2008 locations. Numbers 2, 7, 8, and 12 are wrong.

As a private citizen of Wise County living in the same location since 1970 and a voting member of our local Wise Electric Cooperative, I am saddened and disappointed in our management that is party to such poorly researched information presented in the application for a wastewater treatment facility. If they cannot even locate coop members, how can they operate and maintain a sewage treatment facility.

The present property owners have not been correctly presented on any lists and will not give permission for any such use of their land. Signed easements cannot be continually ignored.

Sincerely,
